PROJECTS

API Health Checker | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS*

- Designed a **full-stack API monitoring** platform with a React **dashboard** to monitor 20+ **API** endpoints, displaying availability, **HTTP** status, and response time.
- Developed a **Node.js** and **Express.js backend** with 5+ reusable **monitoring** components to perform **HTTP** health checks and process endpoint responses.
- Centralized **API** health information into 1 **dashboard**, helping developers quickly identify failed or slow endpoints and reducing repetitive manual **API** testing.

Woody - Interior Design Website | *React.js, Vite, React Router, CSS*

- Built a premium, **responsive** interior-design website with 8+ dedicated sections using **React.js** and **reusable components** for a polished user experience.
- Enabled multi-page navigation using **React Router**, seamlessly connecting the projects, project details, services, team, testimonials, blog, contact, and consultation sections.
- Crafted **responsive** UI, **reusable components**, and smooth interactions to improve cross-device usability, maintainability, and overall user experience.
